Portfolio: [T. Nora Magyar - Cyber Security & Digital Forensics](#)

Personal Profile

I am a second-year Cyber Security with Digital Forensics student at Bournemouth University looking for a 2027/28 industrial placement. I am interested in areas including cyber defence, threat intelligence, security operations and digital forensics and looking to gain practical experience while developing my technical skills.

Education

BSc (Hons) Cyber Security with Digital Forensics

Bournemouth University

September 2025 – Present

Relevant areas of study include cyber security, networking and programming.

Current modules include Ethical Hacking, Security Operations, Network & Cyber Management and Technological Innovations in Cyber Security.

Access to HE Diploma in Computing

The Bournemouth and Poole College

September 2024 – June 2025

Studied programming, databases, networks, web design and computer science.

GCSEs or Equivalent

English, Italian, History and Maths

September 2014 – June 2018

Key Skills

- Basic knowledge of cyber security and computer networks
- Cisco Packet Tracer
- Python programming
- Basic knowledge of databases and web development
- Problem solving and attention to detail
- Communication and teamwork
- Organisation and time management
- Able to work under pressure
- Willingness to learn and develop new technical skills

Projects

Personal Finance Management System – Cybersecurity Lead

Worked as the Cybersecurity Lead in a university group project. Looked at security risks, privacy, permissions and ways to protect users and their financial information.

Network Design and Security

Used Cisco Packet Tracer to design and configure a network using subnetting, VLANs, DHCP, routing and NAT/PAT.

Python Vending Machine

Created a vending machine program in Python using input validation, calculations and file handling.

More details and additional projects can be found on my portfolio: [T. Nora Magyar - Cyber Security & Digital Forensics](#)
